

My Maths

We subscribe to My Maths which is an online maths tool. KS2 children all know how to access it.

www.mymaths.co.uk our log in details are **woodsides** and the password is **circle**

Click on a year group, a topic eg number then on 'lesson'. Your child can then work through each page with you using the next button and using the button down the left hand side. There are lots of examples to be worked through and children's answers are marked so they get feedback too.

Ask your child which area of maths they would like to focus on and work through at your child's pace.
