

**Key Vocabulary**

Root	Roots take in water and nutrients from the soil and keep the plant in the ground.
Flower	The part of a plant that is often brightly coloured and grows at the end of the stem. It helps attract insects and birds.
Petal	Petals are the colourful part of the flower.
Fruit	Fruit contains the plant's seeds. Sometimes humans try to grow fruit without seeds because it's easier to eat.
Stem	The thin, upright part that holds up the plant and carries water and nutrients from the roots to the leaves and flowers.
Leaf / leaves	The part of a tree or plant that are flat, thin and usually green.
Deciduous	A deciduous tree loses its leaves each year.
Evergreen	An evergreen tree keeps its green leaves all year round, even in the winter.
Seed	Seeds grow into new plants.
Bulb	Bulbs grow into new plants.
Wild Plant	A wild plant seed grows where it falls. It doesn't need to be planted or cared for as it grows.
Garden plant	Garden plants are plants that people choose to grow in their gardens.
Weeds	Weeds are wild plants that grow in places where people don't want them.

**Wild or Garden plants?**
